Map Correction-Field Verification

Drain Number: 281

Drain Length: n/a

Drain Name: Armstrong, Evans & Hall

Change + / - : n/a

Date: 06-13-2014

New Length: n/a

Verified By: SLM, SAB

Notes & Sketch:

Mapping was updated to reflect a work order done in 1995 (WO-95-172). A 6" CMP breather was set at Sta. 0 of the tile. The legal description as set out for the Armstrong Evans drain was reviewed and it was determined that this drain was originally constructed as an open ditch and accepted in Jan 10, 1881 (Commissioners Record Book R, page 321 & 582). The drain in 1910 was then tiled from Sta. 0 to Sta. 19+00 (Drain Repair Book 3, page 203). However, there was not a tile size listed in the repair book. However, the above mentioned work order noted that at the Sta. 0 the tile was a 10" clay tile and further downstream the tile became a 12" clay tile. The map has been changed to reflect these tile sizes.
