Notes & Sketch:

Field check was performed to locate & verify the lay out of the Follet portion of this drain. Also, plans were obtained from the city of Carmel showing what we believe to be the 1928 reconstruction of the J.W. Morrow which was when the follet drain was installed. There are no dates on the plans but we believe this to be the case because of elevations taken from the Union traction railroad. Our finds were put into a digital file - therefore there is no map attached. The above mentioned plans have been scanned and filed into our permanent records.
