STATE OF INDIANA)

HAMILTON GOUNTY)

IN COMMISSIONERS. COURT

IN THE MATTER OF THE PETITION Sherican

or Gwinn & Martin II. AL.

FOR THE REPAIR OF THE .T. J. Patter 5.40 URAIN.

REPORT of Drainage Commissioners and Angineer,

To the Honorable Board of Commissioners of Hamilton County,
We the undersigned Commissioners of Drainage and the Engineer, to whom the
above entitled patition for Drainage of certain lands in Fall. Creek
Township, Hamilton County, Indiana, was referred.

We would respectfully report that we met in the Auditore Office, on the ... day of 177.97.5.4.. 1930, qualified and proceeded to View said Drain and lands effected thereby.

After a careful investigation of the condition of said Drain, we are of the opinion that said Drain should be repaired and in a manner set out in this report and that the same when completed will improve the public health and will reclain certain lands, and will be a public utility, and will benefit highways, also that the cost of constructing, damages and expenses of effecting said Drain will be less than the benefits to the lands effected by said Drainage.

That we definately determined the best and cheapest method of effecting the Drainage of such lands, we have fixed the routs, location and character of said proposed work and have fixed the same by metes and bounds, searces, distances, descriptions and guides and Bench Marks, for a complete outlet for the Drainage of said lands effected by said proposed work; that we divided the Ditch into Sections of not more than 100 feet in length by setting stakes at each 100 feet.

X4-62

This copy is from the Digital Archive of the Hamilton County Surveyor's Office; Noblesville, In 46060

LOCATION.

Begin 1029 feet North and 615 feet East of the Southwest Corner of the East half of the Southeast quarter of Section 22, Township 18 North, Range 5 East, Patterson said point being at the entersection of Arm No. 1. to Main, Ditch, Thence South 74 degrees West, to Station 3; Thence 5 degrees Left to Station 9 plus 77; Thence 14 degrees and 30 minutes Right to Station 22 plus 39; Thence 30 degrees Right to Station 25 plus 70, and terminating in Sand Creek at a point which is 735 feet East and 790 feet North of the Southwest Corner of the East half of the Southwest quarter of Section 22, Township 18 North, Range 5 East.

REQUIREMENTS.

Said Ditch, Shall consist of One Row of 16 inch Tile from Station 0 to Station 19 plus 80; And One Row of 18 inch Tile from Station 19 plus 80, to Station 25 plus 70.

Also at Station 0, a Concrete connection Box 2'X3'-6" inside measurements, with 6" Walls and Bottom, severed with a 4" Slab,

And at Station 19 plus 80, One 12"X18" Wye Connection,

And at Station 25 plus 77, shall be built a reinforced Concrete Retaining Wall 3' wide at Bottom and 1' wide at Top and 6' high, and 14' Long, and shall be to a depth of two feet below the grade line of the ditch.

The work will be staked out how by the Engineer and his stakes must be carefully perserved and followed. The digging of each and every portion of the Ditch must be at its outlet, or its junction with another Drain towards its upper end, The datch to be dug along one side of the line of survey stakes, and sufficient distance from not to disturbe them, and shall be dug in a straight and clean manner. In taking out the last draft the blade of the spade must not ge deeper than the grade line. The ditch must be dug accurately and true to the grade at the depth indicated by the figures given by the Engineer, measuring from the grade stakes. The laying of the tile must begin at the lower end and proceed up stream. The tile must be laid as closely as practicable and in a line free from crooks, the pieces being turned about until the upper closes, unless there is sand or fine silt which is likely to run into the tile, in which same the lewer edge must be laid close and the uppper side covered with slay or other material. When making turns or by other unvoidable reason a crack of one-fourth $(\frac{1}{4})$ inch or more is necessary left, it must be securely severed with broken pieces of tile or by other indestructable material, Junctions with branch lines must be carefully and escurely made.

After the tile have been laid and inspected by the Engineer or his representives, they must be covered with the earth excavated from the trench, or berrowed clay or soil. Where said trench does not afferd sufficient material, and in no case less than two (2) feet in depth over the tile in New Guts, and where said Drain is in an open channel the filling shall be to a depth of not less than Two (2) feet above the top of the tile, for the full width of said channel, in no case must the tile be covered with said without other material being first used, and in no case will boulders or heavy rock be allowed in the filling if they may in time case in contact with the tile.

The ditch contractor must assume all risk from saving in of the dutch, and when each drain is completed it must be free from sand and mud before it will be received and paid for in full, In case it is found impracticable, by reason of bad weather or other unlooked for trouble in digging the ditch or properly laying the tile, to complete the work specified in the contract, the time may be extended as mutually agreed upon by the contractor and the Engineer.

The contractor shall use all necessary pressusions to secure his work from injury while he is constructing the Drain.

All tile and material used in the construction of this drain and its tributaries thereto, included in the requirements of these specifications, shall be first class in every respect and subject to rigid inspection by the Engineer.

The Engineer shall have authority to lay out and direct the work, and to inspect and supervise the same during the construction and completion to see that it is properly done in accordance with the specifications and contract, and his instructions shall be fully carried out.

CONCRETE WORK.

Unless otherwise specified all concrete work included in these specifications shall be a mixture of 1-2-3; One part Portland Cement, Two part Sand and Three part Gravel.

The sand and Gravel to be free from dirt, loam and other fereign matter,

The Cement, Sand and gravel to be thoroughly mixed while dry until it presents
an even shade of coloring throughout, then made into a moderately wet mertar,
and be immediately placed in the forms for moulding the constructed into shape.

The forms for all concrete work shall be neately constructed free from strong
materials and shall be true to lines, dimentions and shape given for the
different structures.

STATE OF INDIANA) SS Hamilton Gounty)

We the undersigned Viewers and Engineer, to whom was referred the above entitled petition for report, after being duly Sworn upon Oath say that we have personally examined the whole line of said proposed Ditch, that the assessments herein made and reported are correct, just and equitable to all parties herein as interested. That no other lands will be benefitted or injured by said proposed Drain, and that the above and foregoing report is true in substance and in fact as we verily believe.

Silas, S. Sevanos E. F. Mepfer

Maginoor,

Subscribed & Sworn to before me this Widay of July ... 1930

Of Hamilton County.
