TO: Hamilton County Drainage Board RE: Thomas Pearce Drain

On May 24, 1993 representatives from Hamilton, Boone and Clinton Counties met to discuss the Thomas Pearce Drain. At that time, due to the high percentage of objections to the reconstruction of the drain in Hamilton and Clinton Counties, it was decided not to create a Joint Drainage Board for that purpose Instead, it was decided that Boone and Clinton Counties would form a Joint Board for maintenance and Hamilton County would set the portion of the drain within Hamilton County on maintenance also. A Joint Board for reconstruction would only be established when a substantial number of landowners in all three counties petition for reconstruction.

At this time the Thomas Pierce is number 18 on the reconstruction classification list. However, due to the above described meeting, I recommend it be placed on the maintenance classification list at this time. The drain was requested for classification on April 22, 1980 by Luther Powell.

Hamilton County has 1,406.63 acres in the Pearce Drainage Shed. I recommend the Board assess the Drainage area \$3.00 per acre with a \$10.00 minimum. This will bring in $\frac{4263.38}{2}$ annually to the fund. Although it will not solve all the problems on the drain it will be enough to take case of debris blocking the g. Dom flow, beaver dams, partial cleaning and erosion control.

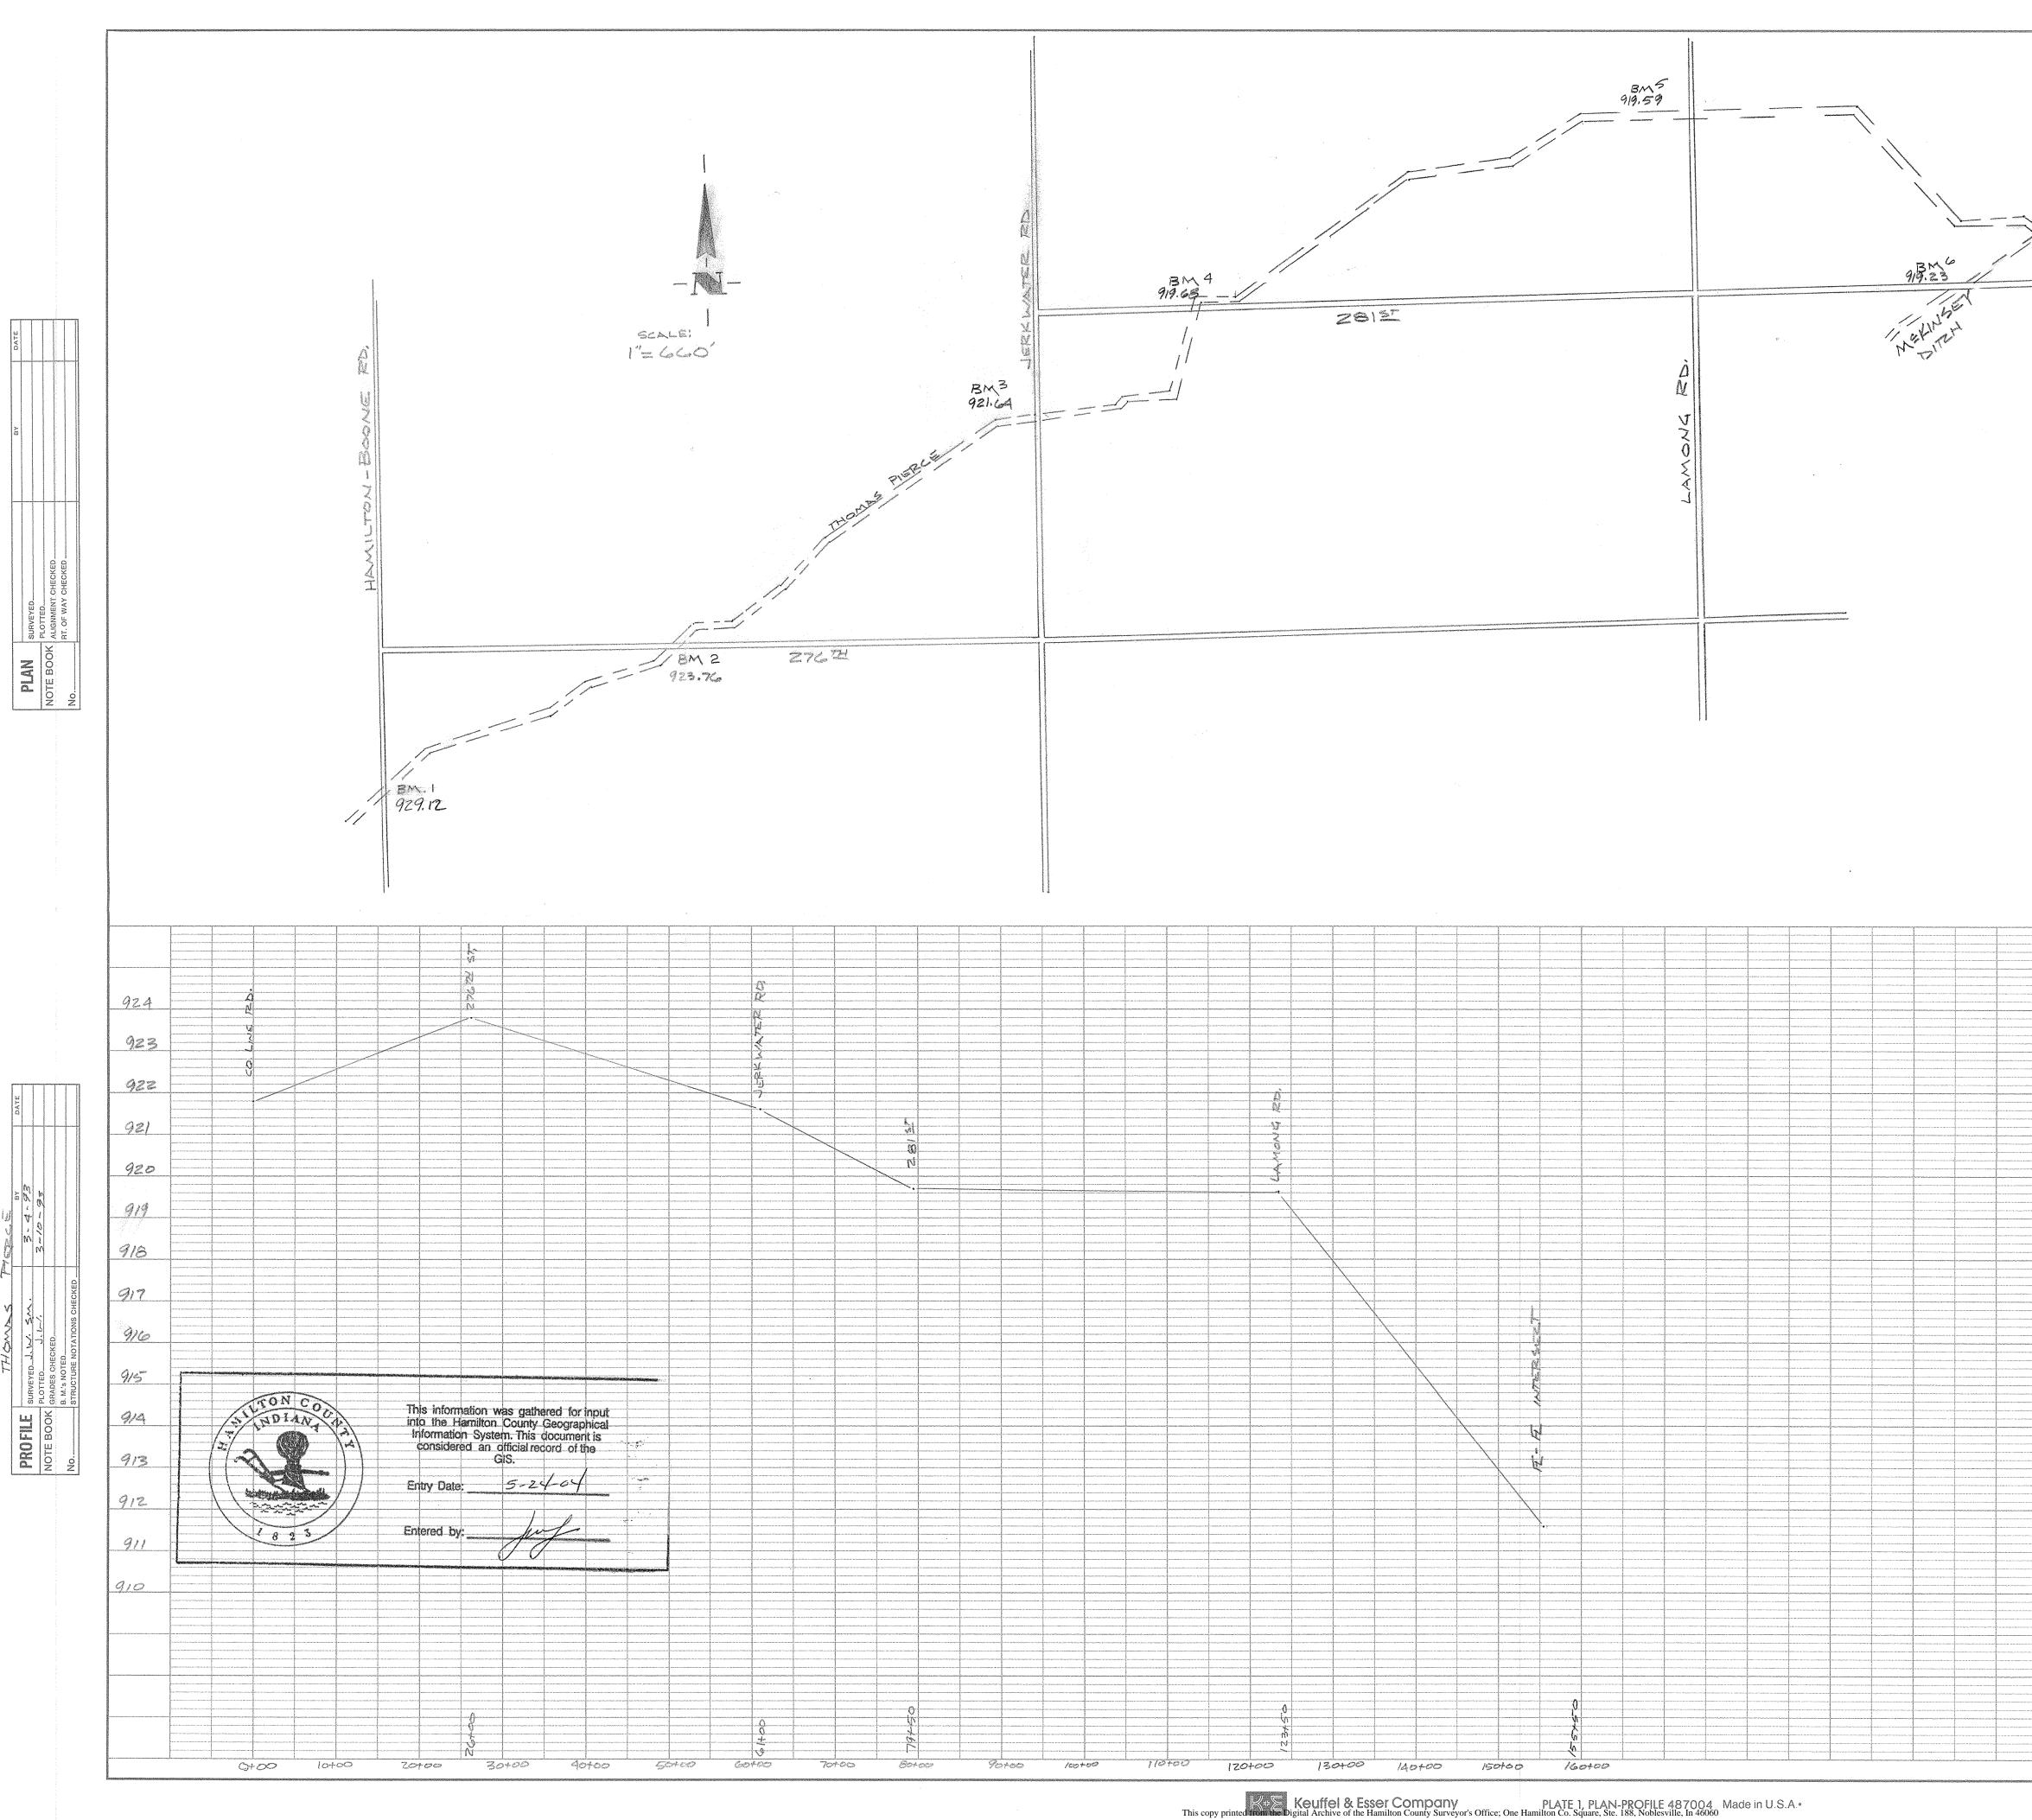

I recommend a hearing for this be set for August 1993.

Kenton C. Ward

Hamilton County Surveyor

KCW/no
