RE: Springmill Streams Drain-Springmill Ridge, Section 4 Arm

Attached is a petition, non-enforcement request, plans, calculations, Quantity Summary and assessment roll for the Springmill Streams Drain, Springmill Ridge, Section 4 Arm.

I have reviewed the submittals and petition and have found each to be in proper form.

I have made a personal inspection of the land described in the petition. Upon doing so, I believe that the drain is practicable; will improve the public health; benefit a public highway and be of public utility; and that the costs, damages and expenses of the proposed drain will probably be less than the benefits accruing to the owners of land likely to be benefitted. The drain will consist of the following:

6" SSD	700 feet	15" RCP	364 feet	Open Ditch	50 feet
12" RCP	625 feet	18" RCP	335 feet		

The total length of the drain will be 2074 feet.

The open ditch listed above is between STR #662 and the Collins Drain between Lots 77 and 78.

I have reviewed the plans and believe the drain will benefit each lot equally. Therefore, I recommend each lot be assessed equally. I recommend a maintenance assessment of \$20.00 per lot, \$2.00 per acre for roadways, with a \$20.00 minimum. With this assessment the total annual assessment for the drain/this section will be \$540.00.

The subsurface drain (SSD) laterals off the main SSD are not part of the regulated drain nor will the SSD laterals out of STR #661. The SSD under the curb also will not be part of the regulated drain.

I recommend a hearing be set for November 9, 1987.

RE: Springmill Streams Drain-Springmill Ridge, Section 4 Arm

I have inspected the drainage facilities for the Springmill Streams Drain, Springmill Ridge, Section 4 Arm and have found them to be complete and acceptable. The Project Engineer has submitted the Certificate of Completion and Compliance and "As Built" Drawings on reproducible mylar of the drainage system.

Only one minor change was made during the construction of the drainage facilities. Instead of outletting the subsurface drain along 131st Street into STR 658 it was instead placed in STR 682. The length of the drain remains the same as stated in my September 13, 1987 report at 2074 feet.

At this time I recommend the Board approve the drainage facilities as constructed. I further recommend that the non-enforcement request for this plat be approved by the Board.
