Re: Stultz and Almond Drain, 141st Street and Towne Road – Roundabout

Attached are petition, plans, and other information for the proposed reconstruction of the Stultz and Almond Drain, for the 141st Street and Towne Road Roundabout project. The reconstruction was petitioned by the City of Carmel. During this reconstruction, the Stultz and Almond Drain – Lakeside Park Section 5 Arm will be affected. Those changes are as follows:

**Stultz and Almond Drain**

Stultz and Almond Drain – Lakeside Park Section 5 Arm: The project will remove 210 feet of 6” SSD to the east and south of structure labeled as 105 per the plans for Lakeside Park Section 5, prepared by Stoepelwerth & Associates, having Job Number 41760S5, and date of 9/1/06. Also, the structure labeled as number 408 per the road plans, which is on the main Stultz and Almond Drain, will be changed from an inlet casting to a solid manhole casting and adjusted to match the pavement grade. This is shown on Sheets 19 and 20 of the plans prepared by American Structurepoint, Inc., having City of Carmel Project Number 06-12, and dated April 16, 2008.

The road project will remove 210 feet of the Stultz & Almond Drain, Lakeside Park Section 5 Arm.

The cost of the reconstruction is to be paid by the City of Carmel. Because the project is to be paid by the petitioner and is being completed within the right of way owned by the City of Carmel, the project falls under the requirements as set out in IC 36-9-27-52.5. Therefore, a hearing with 30 day notice is not required for the petition.

I recommend the Board approve the project at this time.

Sincerely,

Kenton C. Ward, CFM  
Hamilton County Surveyor
