STATE OF INDIANA, HAMILTON COUNTY, SS:

IN THE MATTER OF THE

THISELETHWAITE ET AL, DRAIN.

REPORT OF DRAINAGE COMMISSIONERS AND ENGINEER.
***** ** ***** ***** **

TO THE HONORABLE JUDGE OF THE HAMILTON CIRCUIT COURT.

We, the undersigned Re-viewers and Engineer to whom was referred the above entitled petition for drainage, would respectfully report that on the 4th. day of April, 1908 at 10 o'clock, we met at the law office of Pearson & Pearson in the town of Sheridan, Hamilton County, Indiana, where after being duly qualified to act in the above entitled cause, we proceeded to view and examine said proposed drain and lands likely to be effected thereby. Owing to the extent and magnitude of the work we were unable to complete view on above date and adjourned until April 9th which day being rainy, we by mutual agreement arranged to meet again on April 14th. on which date we again took up the work and finished same on April 16th. Being granted extention of time by the Court until April 25t in which to finish and file report, we met in the office of the County Surveyor on April 21st., 22nd., 23rd. & 25th. and formulated the following report.-

We would respectfully report that the drainage as proposed is practicable; that the same when completed will improve the public health and will be of public utility; that there will be ten public highways, Two public school grounds, the streets and alleys of the town of Sheridan and the Right-of-way of the Chicago, Indianapolis and Louisville Railroad benefited by said drainage.

We would further report that the cost of construction, damages and expenses of effecting said proposed drain will be less than the benefits to the owners of the lands likely to be benefited by said proposed drainage.

We would further report that we have definately determined the best and cheapest method of drainage said lands; we have fixed the route, location and character of said proposed work and fixed the same by metes

and bounds, courses, distances and descriptions, grades and bench marks, including all necessary arms and branches so as to provide for the complete drainage of the lands to be effected by the proposed work. That we have divided the drain or ditch into sections, each not more than one hundred feet in length, and have computed ~~###~~ and set out the number of cubic yards of excavation in each station, and we have assessed the benefits and damages as the case may be, to each separate tract of land and to each corporation and township effected; that we have fixed the beginning and outlet so as to secure the best results, and we have run the line of said ditch so as to secure the best results and cause the least possible injury to the lands effected, and so as to benefit the public highways. In the course of the ditch we have followed the old channel as near as possible, ~~#####~~ and the work of excavating shall be done by shovel.

We have divided the drain into sections of 100 feet in length by setting stakes at each one hundred feet and numbered from station 0 to station 198, on the main ditch, and from station 0 to station 56+30 on Arm No. 2 of main ditch, and from station 0 to station 16 on Arm No. 1 of main ditch, and from station 0 to station 13 on Arm No. 1 of Arm No. 2, and from station 0 to station 11+74 on Arm No. 2 to Arm No. 2.

We have determined that the best and cheapest method of securing said drainage is by a Main ditch and two arms or tributaries and also two arms or tributaries to Arm No. 2 of the Main ditch which are each described and located as follows:-

LOCATION *****

Main Ditch,

Beginning at a point 720 feet south of the center of Section 31, Township 20, North, Range 3 East, run thence south 3225 feet, thence East 700 feet, thence South 1700 feet, thence S 65° W 1800 feet, thence S 35° W 900 feet, thence N 40° W 800 feet to the County Line, thence N 80° W 1400 feet, thence S 80° W 1300 feet, thence S 40° W 1100 feet, thence S 30° W 675 feet, thence west 1500 feet, thence S 45° W 600 feet, thence S 30° W 1100 feet, thence S 70° W 800 feet, thence S 20° W 600 feet,

thence S 10° W 1600 feet, and terminating in what is known as Eagle Creek Ditch 70 rods east of the center of section 11, township 19, range 2 east.

Arm No. 1 of Main Ditch.

Arm No. 1 of the main ditch begins at a point 880 feet ~~xxxx~~ north and 100 feet west of the center of Section 31, township 20, range 3 east and run south 30° east 800 feet, thence S 10° W 600 feet, thence S 30° E 200 feet and terminating in the Main ditch at station 0.

Arm No. 2 of Main Ditch.

Arm No. 2 of the Main ditch begins at a point 1580 feet east of the center of Section 31 township 20, north, range 3 east, and run thence S 15° W 400 feet, thence S 25° W 33 feet, thence S 1800 feet, thence S 40° W 200' THENCE S. 2500' THENCE S 80° W 430 feet, terminating in the Main ditch at station 49+50.

Arm No. 1 to Arm No. 2.

Beginning at a point 600 feet west and 300 feet south of the northeast corner of the south west quarter of the north east quarter of Section 31 township 20 north, range 3 east. and run thence south 70° east 350 feet, thence south 43 degrees east 450 feet, thence south 10° west 500 feet terminating in ~~the~~ Arm No. 2 of Main ditch at station 0.

Arm No. 2 to Arm No. 2.

Beginning at a point 700 feet west of the north east corner of the south ~~xxxx~~ east quarter of Section 31, Township 20 north, range 3 east, and run thence south 200 feet, thence S 40° W 400 feet, thence S 60° W 274 feet terminating in Arm No. 2 of Main ditch at station 7.

REQUIREMENTS.

Main Ditch.

To consist of one row of 15 inch tile from station 0 to station 49+40 and one row of 15" sewer tile from 49+40 to 49+50----- and an open ditch two feet wide in the bottom from station 49+50 to station 91+10 and an open ditch three feet wide in the bottom from station 91+10 to station 198+00 or terminus. ^{on open portion} All banks shall be cut to a uniform slope of 1 to 1 or 45°.

Arm No. 2 of Main ditch.-

To consist of one row of 12 inch drain tile from station 0 to station 7+55, and one row of 16 inch drain tile from

Arm No.1 to Arm No.1. (Cox's Arm)

To consist of one row of ten inch drain tile from station 0 to station 8+84 and one row of twelve inch drain tile from station 8+84 to station 16+00. (End of this arm same as station 0 on Main ditch,)

station 7+55 to station 26+85, and one row of 18 inch drain tile from station 26+85 to station 56+30 or terminus of arm.

Arm No. 1 to Arm No.2.-

To consist of one row of 12 inch drain tile from station 0 to station 13 or terminus.

Arm No. 2 to Arm No. 2.

To consist of one row of 12 inch drain tile from station 0 to station 11+74 Or terminus. That part of Arm No.2 to Arm No,2 from station 0 to 3+05 being in place and accepted as sufficient.

C A T C H B A S I N S .

At station 0 on arm NO,2 of Main ditch

At station 8+84 on Arm No. 1 of Main ditch

At station 26+85 on Arm No.2 of Main ditch *VP*

At station 19+35 on Main ditch *x*

At station 7+55 on ArmNo. 2of Main ditch

At station 50+75 on Arm No.2 of Main ditch *x narrow end of tile*

All above mentioned catch basins to be built from hard burnt brick laid up in mortar made of one part Portland cement to three parts clean, sharp sand and covered with an iron ring and open cover of the Elwood Iron Works pattern. Dimentions of saame to be 22 inches in diameter. Said catch basin to be three feet in diameter inside measurement, the walls to be 9 inches thick and extend to a depth of 18 inches below the bottom of the tile and to a hight to conform with the general condition of the ground. The bottoms of the catch basins to be floored with one layer of brick and plastered $\frac{1}{2}$ inch thick with cement mortar over bottoms and sides to one foot above the top of the tile. All inlet and outlet tile to be first grade sewer tile and to be built in the walls of the catch basins.

R E T A I N I N G W A L L S .

At station 49+50 (at the end of the tile) to be constructed a retaining wall of field rock laid up in mortar of one part Portland cement to three parts clean, sharp sand. Said wall to be 20' by 6' by 2'. and built to conform to drawing furnished by the Engineer in charge of the work.

T I L E & M A T E R I A L .

All tile and material used in the construction of the work to be first class in every respect and subject to the inspection and approval of the Superintendent in charge of the work before being used.

L A Y I N G T I L E .
F I L L I N G D I T C H
D E A D N I N G A N D G R U B B I N G .

After the tile portions of the ditch have been dug to the proper the tile shall be laid in the trench at the correct grade as shown on the profile herewith attached and marked " EXHIBIT" B" in a true line with the joints well matched and to be left uncovered until inspected and accepted by the Engineer in charge of the work, after which they shall be covered with earth to a depth of 24 inches for the full width of the open channel where cut runs in the old channel and where the ditch is new cut the trench shall be filled full and well packed so that no settlement may occur. Where catch basins are built the filling shall be made so the surface water may flow into the basins.

✓ All earth removed from the open portions shall be deposited not n nearer than two feet from the break of the banks.

All trees, shrubs, weeds and rubbish on the open portion of the ditch shall be gut and removed on each side to a distance of five feet from the break of the banks.

Trees and bushes along the tile part of the ditch shall be deadened back 25 feet on each side of the ditch.

At station 120 to 121 on the Main ditch, and also from station 123 to 125 on the Main ditch the channel to be straightened by new cut.

F A L L O F E S T A B L I S H E D G R A D E .

Main ditch 10/100 ft. to each 100 feet from station 0 to station 198.

Arm No.1 of Main ditch 33/100 ft. to each 100 ft. from station 0 ~~to station 12~~
~~to station 12~~ TO station 12 and 1 ft. to each 100 ft.
from station 12 to station 16.

Arm No.2 of Main ditch 33/100 ft. to each 100 ft. from station 0 to station 7+55, and 9/100 ft. from station 7+55 to station 56+30.

Arm No.1 to Arm No.2, 50/100 ft. to each 100 ft. from station 0 to station 7 and dead level from station 7 to station 11+74.

Arm No.2 to Arm No.2, 11/100 ft. to each 100 ft. from station 0 to station 13.

STATE OF INDIANA

SS:

HAMILTON COUNTY

The undersigned Viewers and Engineer to whom was referred the above entitled petition for report , after being first duly sworn upon oath ,sats that they have personally examined the whole line and route of the proposed drainage , that the assessments herein made and reported are correct,just and equitable to all parties therein named as interested; that no other lands will be benefitted or injured by said proposed drain; that the above and foregoing report is true in substance and in fact as we verily believe.

VIEWERS.

Oliver P. Higgins
W. C. Clark

Hugh Johnson
Engineer

Subscribed and sworn to before me this 25th. day of April, 1908.

Leroy J. Patty
Clerk H. C.
