RE: J.W. Wagner Drain

Attached is a design report and assessment roll for the reconstruction of the J.W. Wagner Drain. This reconstruction will consists of replacing the present 15" tile with 2900 feet of 12" tile.

The cost estimate prepared by John South, Soil Conservation Services Engineer, totals \$17,406.00. With a drainage shed of 233.44 acres the cost per acre will be \$74.56.

I request the Board to set a hearing for the proposed reconstruction for March 2, 1981

RE: J.W. Wagner Drain

On June 15, 1981 I made a final inspection on the reconstruction of the J.W. Wagner Drain by Perry Davis. At this time I found that it was complete and acceptable. Two claims have been submitted for payment. One claim for 85% of the contract price in the amount of \$10,748.00 and another for \$1,172.42 for extras such as 60' of 12" tile, tile investigation and tie-ins. A claim for the 15% retainer, \$1897.00 will be submitted later.
