RE: Mallott-Carson Drain

At the time of the reconstruction hearing last year I did not know that two other drains existed. The drains are the W.C. Baker and the Mary Snyder and are shown on the attached map.

The W.C. Baker is a tile drain 1820 feet in length. It was constructed in 1888 by order of the Commissioners and according to records it has not been repaired or assessed since then. I do know however, that the County Highway this last Spring replaced tile through the right of way for 246th Street and constructed a new catch basin on the South side of the road. An inspection was made on the drain and it was found to be in good condition. At this time the Drainage Shed for this drain is being assessed on the Mallott-Carson Drain.

The Mary Snyder Drain is a tile drain 3450 feet in length. The drain was constructed in 1890 by order of the Circuit Court and according to the records it has not been repaired or assessed since. An inspection was made of this drain and it was found to be in good condition except for the outlet which needs some repair. This repair could be covered with a maintenance program. Most of the drainage shed for this drain is also being assessed on the Mallott-Carson Drain.

The Jesse DeVaney Drain was also inspected and it was discovered that some clearing, snagging and erosion control is needed from the intersection of the Fred Seeright Drain to the center of Section 29, Twp 20 N, R 4E. This also could be done as part of a maintenance program.

Because of the above, I recommend that the W.C. Baker, Mary Snyder and the above described portion of the Jesse DeVaney Drain be included in the Drainage

Shed of the Mallott-Carson Drain, thus included on its maintenance program.

The changes on the Drainage Shed are as follows:

These changes are reflected in the attached section composites.

The Attached Drain Map shows the drain presently being assessed on Maintenance in Blue. The portion to be added is shown in red. In orange is the Fred Seeright Drain which is under it's own maintenance program. I do not recommend that the Seeright Drainage Shed be assessed as part of this extention and I have not included any portion of it in the assessment.

I request a hearing on the above recomendation be set for 1:45pm on February 7, 1983.
