Reviewer's Report of Anna Buscher

Ditch.

To the Honorable Board of Commissioners of *Hamilton* County, Indiana:

We, the undersigned, appointed by this Court, at its *Sept Reg* Term, 1897, to view a drain described in the certified copy of a petition and order of Court for a *Ditch*, by *Anna Buscher* and others, handed us by the Auditor, would represent that according to said order we, on the day named therein, to-wit: the *26th* day of *Oct*, 1897, in company with *J.A. Mitchell*, a civil engineer, made an accurate survey of the line of said proposed *ditch* from its source to its outlet. A plat of said *Ditch* is filed herewith including the survey by the engineer, marked "Exhibit *B*." We caused stakes to be set along said line, each one hundred feet, numbering down stream, as shown by plat. We also made a computation of the total number of cubic yards of earth to be removed from said drain, and estimated the total cost for the construction of the work at *\$11460* Dollars. We also apportioned and set apart to each parcel of land a share of said work in proportion to the benefits received, all of which will fully appear by a tabular statement in this report. We have also set out by a statement below, the names of the owners of lands benefited with a description of each tract of land, and the amount assessed against each tract. The depth of cut, the width at bottom, and width at top along said drain is also shown in a tabular statement in this report. After a full and careful view and examination, we are of the opinion that the drain as located by the survey will be of *public utility* and will benefit *one public highway* and the cost of construction of the proposed drain will be less than the benefits to be derived from the construction thereof. That the proposed drain can best be accomplished by a *tile ditch* from its source to its outlet. (as indicated on pg 3 of this report.)

The following statement shows who are benefited, the lands thereof and assessment thereon, location, length of each share, amount of assessments, amount of benefits, amount of dirt to be removed from each share, price thereof per cubic yard, and total cost of each share:

NAMES OF OWNERS.	DESCRIPTION OF LANDS.	Section.	Township.	Range.	Acres Assessed.	Faths Assessed.	Acres Benefited.	Faths Benefited.	Amount of Benefits.	Amount of Asses'ments.	From Station.		Feet Long.	Cubic Yards to be Removed.	Price per Cubic Yard.	Cost of Construction of Share.	
											From Station.	To Station.
