Re: J.M. Thompson Drain

Attached are the plans for the proposed drain extension of the J.M. Thompson Drain west of U.S. 31. The proposed extension will replace existing 10" and 12" clay field tiles from Sta. 6+70 to Sta. 18+60 on the drain.

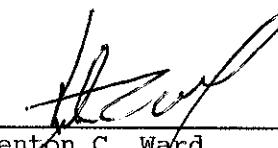

The cost estimate for the drain extension is as follows:

24" RCP	470'	@ 43.75 lin. ft.	\$20,562.50
30" RCP	730'	@ 51.75 lin. ft.	37,777.50
60" Manhole	3	@ 1,500.00 each	4,500.00
(Str. 19,20,21)			

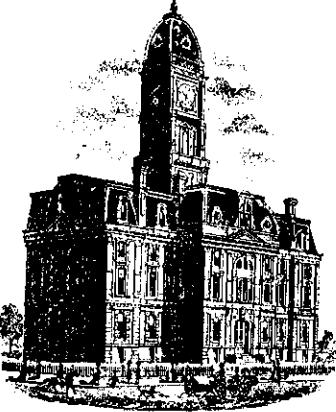

The estimated cost for the extension is \$62,840.00.

The proposed extension will not increase the reconstruction assessment for the drain as there is enough monies in the fund to complete the work. The engineer's estimate for the drain project was \$709,017.00. The amount submitted by the contractor to date for payment is \$595,032.72 leaving a balance of \$113,984.28 in the reconstruction fund.

A hearing has been set for October 15, 1990.

Re: J.M. Thompson Drain

In April of 1991 a final inspection of the reconstruction of the J.M. Thompson Drain was made. At that time work was found to be complete and acceptable. This work was completed by General Metro Corporation. The Engineer for the project was Douglas E. Miller, P.E. of Miller Consulting.

The reconstruction report for this project is dated November 20, 1989. The hearing for the project was on December 18, 1989. The bid opening was held on March 19, 1990. The original project bid was for \$499,246.00. However, due to several modifications and additions, the total project construction cost is \$665,625.28; total engineering cost is \$26,556.75 for a total project cost of \$692,182.03. The total cost estimate per my report dated November 20, 1989 was \$709,017.00. Although the certified assessment to the Auditor dated October 15, 1990 was for \$704,098.04, on April 22, 1991, the Drainage Board reduced the assessment roll by removing nine parcels at a total of \$8,232.00 leaving the total assessment at \$695,866.04. At this time 12 additional tracts have been removed per letter dated 04-15-92. These tracts were inadvertently left off of my 11-20-89 report. The total to be removed per the 04-15-92 report is \$13,680.00 for a total assessment of \$682,186.00. Although the total assessment as certified will fall below the total project cost, the certified assessment does not reflect \$22,289.50 of cost billed back to Chrisman, GTE & Marathon. This is detailed elsewhere in this report. The total assessment with these added is \$704,475.54 which is more than the total cost of the project.

During the course of the project a total of five change orders were submitted to the contractor. Change Order #1, dated June 12, 1990, covered the extension of storm drains in the Newby Addition to the open ditch. The change order also revised the location of the Hoover Street crossing. The sixth paragraph, third line shows the amount of the street repair at \$1,280.00. The correct figure is \$1,299.20. The total increase for #1 change order is \$8,483.20.

Change Order #2 ran the new storm line from Str. 17, located along the west right-of-way of Union Street, under U.S. 31 to Str. 18, located along the west right-of-way of U.S. 31. Also, because of a request from the Town of Westfield, a 36" RCP was placed along the south side of Hoover Street. The total for this change order was \$84,000.00.

Due to the construction of the GTE/Sylvania Building a 12" RCP with Structure was installed as Change Order #3. This 64' length of pipe was installed along Union Street, north out of Str. 17. GTE/Sylvania is to pay \$1,052.00 of the \$2,595.50 total cost per Drainage Board Minutes of November 19, 1990.

J.M. Thompson Drain  
April 16, 1992 - Page 2

The work for Change Order #4, dated November 5, 1990 was an extension of the drain west of U.S. 31. A hearing for this extension, per a report dated October 5, 1990, was held on October 15, 1990. The cost for this work was \$60,808.75. The State Highway Department has approved and released this work as complete.

Change Order #5, dated April 18, 1991, was per installation of a fence in the park, as ordered by the Drainage Board. The total for this work was \$5,375.00.

Additional extra work as specified in the contract in regard to tile outlets amounted to \$5,116.83.

Billings for work done on this project for three individual situations have been sent. These three items have not been included in the total assessments as discussed above. Included is the work as noted above for Change Order #3 to GTE/Sylvania for \$1,052.00. Also, per the Drainage Board action on June 25, 1990, it was ordered that Leo F. Chrisman & Max Bender pay one third (1/3) of the cost for extending a sump pump outlet in a 4" plastic tile for 165 feet. (See violation letter dated June 12, 1990.) The \$1,312.50 cost was to be shared equally by the drainage shed, contractor and owner for a total cost to the owner of \$437.50.

The special structure for installing the storm sewer under the Marathon Pipeline was to be paid by the pipeline. These were used in lieu of lowering the pipeline. The cost for this work amounted to \$20,800.00.

The new drain now intercepts the original 1899 drain at or near its Sta. 6+70, which is the same as Str. 20 shown on Sheet 5A of the as-builts and runs back into the original drain at Sta. 60+90 which is Sta. 3+50 on Sheet 2 of the as-builts. The tile drain as described in the 1899 report between Sta. 6+70 and Sta. 60+90 is vacated as part of this work. The original drain from Sta. 0 to Sta. 6+70 and from Sta. 60+90 to Sta. 90+00 will remain regulated drain. This amounts to 3580 feet of the original drain.

The new drain consists of the following lengths:

#### Main Drain

Str. 19 to 20	470' of 24" RCP
Str. 18 to 19	730' of 30" RCP
Str. 17 to 18	202' of 36" Steel Casing
Str. 17 to 18	190' of 36" RCP
Str. 14 to 17	1030' of 42" RCP
Str. 12 to 14	635' of 48" RCP
Str. 11 to 12	100' of Twin 36" RCP
Str. 10 to 11	350' of 68" x 43" RCPA
Str. 4 to 10	1410' of 54" RCP
Outlet to Str. 4	20' of 72" RCP
Sta. 3+50 to Sta. 0	350' of Open Ditch

Total      5487 feet

J.M. Thompson Drain  
April 16, 1992 - Page 3

Arm #1  
Str. 1 to Str. 4                            765' of 36" RCP

Arm #2  
Str. 13 to Str. 13A                        68' of 12" RCP

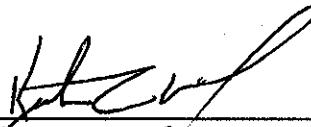

Arm #3 (GTE/Sylvania)  
Str. 17 to Str. 17A                        64' of 12" RCP

Main Drain Overflow  
Str. 6 to existing pipe                    280' of Open Ditch  
    under Hoover Road

Existing pipe under Hoover Rd.        36' of 5.65' x 3.35' CMP  
New pipe south side of Hoover Rd.    100' of 36" RCP

The total length of new drain is 6800'.

The contractor has submitted a statement that all material costs and wages have been paid. I recommend the Board accept the drain as complete.
